WHO WE ARE

Security, Engineered for the AI Era

Excelon Cyber Solutions Private Limited is a Ludhiana-based cybersecurity and technology firm founded by **Vandana Kochhar** — a visionary leader on a mission to revolutionise security through AI. Her goal: build specialised systems that protect children online, keep the elderly safe from scams, and help enterprises defend themselves in an increasingly hostile digital world.

| | | | |
|----------------------------------|---------------------------------|----------------------------------|--------------------------------|
| 96% DETECTION ACCURACY | 75% LATENCY REDUCTION | 83% FASTER CONVERGENCE | 3+ YEARS IN SECURITY |
|----------------------------------|---------------------------------|----------------------------------|--------------------------------|

WHY TRUST US

Security-First Approach

Every assessment follows OWASP standards and real-world attacker techniques. We focus on vulnerabilities that pose genuine business risk — not checkbox compliance.

Automated-First Pentesting

It is the era of automated pentesting. Our AI-powered pipelines scan deeper and faster than any manual effort — verified by expert analysts for zero false noise.

Actionable Reports

We explain impact, provide proof-of-concept evidence, and deliver clear remediation guidance so your team can fix issues efficiently.

Research-Driven Expertise

Our team actively studies emerging threats, modern exploit techniques, and evolving attack vectors — every assessment reflects today's threat landscape.

SERVICE 01

Web Development

In 2026, a business without a website is a business without a foundation. We design and build static and dynamic websites — scalable, SEO-friendly, and coded securely by default. Every line is written with security in mind, from input validation to HTTPS hardening.

E-Commerce · Portfolios · SaaS Dashboards · CMS · Job Portals · Multi-vendor Marketplaces

AVAILABLE NOW →

SERVICE 02

Startup Consultancy

We equip growing businesses with complete operational infrastructure: CRM and lead dashboards, admin panels, attendance systems, and full team portals. Built responsively and securely — every system scales without breaking, so your team can focus on growth instead of firefighting.

CRM Systems · Lead Dashboards · Admin Panels · Course Platforms · Team Portals

AVAILABLE NOW →

SERVICE 03

Web App Pentesting (WAPT)

AI-powered, automated penetration testing for web applications and APIs — verified by expert analysts. Fast, reliable vulnerability reports without surface-level noise. Coverage includes OWASP Top 10, broken access control, injection flaws, DevSecOps review, and LLM & AI application security.

Black Box · Grey Box · White Box · Bug Bounty Assistance

AVAILABLE NOW →

SERVICE 04

AI-Based Cyber Tutor

A patent-pending intelligent tutoring system that teaches cybersecurity dynamically — adapting to each learner's capability and pace. Built for students who lack a clear roadmap into the field: personalised learning models, fine-tuned LLMs, designed for Web 4.0.

Patent Filed · Adaptive AI · Personalised Curriculum

COMING SOON

PATENT CONSULTANCY

File Your Patent. We Handle Everything.

From drafting and documentation to filing and examination follow-up — our experts manage the complete patent process end-to-end. We have filed and secured our own patents; now we do it for you.

₹899/-
